

**SIN RUBTECH® POLYMER BOUND  
PREDISPERSED CB330-40G****Product Description**

Composition:	A proprietary predispersed 40% N330 Carbon Black in a 60% elastomeric / processing aids binder specially formulated for use in EPDM, NR, SBR, BR formulations
Appearance:	Black Granules.
Density:	Approx. 1.07 g/cm <sup>3</sup> .
ML 1+4 @ 50°C	< 70
Moisture Content:	< 1.0 %
Melting Point:	N/A
Storage Stability:	At least 2 years under normal storage conditions.
Packing:	20 kg nett in sealed PE bag in a carton box.

**Recommendations and Applications**

CB330-40G is a Sin Rubtech® tailored-made polymer bound predispersed combination to replace powder grades of such chemicals.

Polymer bound predispersed CB330-40G is recommended when a more eco friendly material, higher productivity and better dispersions required. This often translates to lower bottom-line costing.
